

FCC:

Once again the powers that may be are trying to take Christianity away from the public. These Christian Broadcasting stations do not only spread the Word, but also give artist the chance to let their music be heard to those who want to hear. They also tell the news about what is going on around the world. They focus on the good things that are going on around the world, not just the bad things. This alone sets them apart from other radio stations. Now the last time I checked, we have the freedom of speech and religion. Why are we putting restrictions are things that our Four Fathers put in place to separate this great nation from the rest of the world? There are a lot of Broadcasting stations that should not be on the air, both on radio and tv. But that is not my choice to make. It is my choice to make sure that my family doesn't listen or watch those programs. We fought the English because we suffered from Taxation without Representation. We are doing the same thing if Christians cannot use the media as part of our Representation. Why focus on one cause and not everyone else? Where is the common good for everyone? God told us to reach out to everyone, everywhere. Those that will listen need to hear what God has in store for us. I am a God fearing man and I know that He is going to take care of this situation. Man is never going to overcome Him. If there is any love for mankind, don't hinder the ability to spread the Word to everyone, everywhere. God has a plan and whatever it maybe, the Word of Jesus Christ, Our (Mankind) Lord and Savior, will be Spread like wildfire. All those that bow to Him now, will rejoice in the Kingdom of Heaven forever and ever. Amen
